Level 2 Student Assessment Sheet - Technology Supplement*

***For ESOLC classes with access to a computer lab**

Teacher Name:_____
Class:_____
Session:_____

Please indicate if the students achieved each objective. Students achieve objectives if they demonstrate in class that have the ability to perform them.

Standard Technology Objectives																								
1. Comfortably manipulate the mouse on any given computer.																								
2. Use the keyboard to type their first and last names.																								
3. Explain CD-ROM usage and storage.																								
4. Understand what the Internet is.																								
5. Become familiar with basic Internet navigation.																								
Teacher's Choice (Optional) - Include additional technology objectives covered during the session that you want to record																								
Total																								

For Reference: Detailed Performance Outcomes

To demonstrate their knowledge, students will:
1. Successfully move the mouse around the computer screen and click on the appropriate icons to open and close programs.
2. Type their first and last names correctly for the teacher.
3. Explain how to use a CD-ROM, why it is used, how to insert it, remove it, and store it properly.
4. Explain what the Internet is.
5. Demonstrate how to open an Internet browser, navigate a simple site, and close the browser (using an ESL website or another website appropriate for the class).
